

INVESTIGATION DERIVED WASTE

At Cascade, we understand the complexity of IDW management and the importance of maintaining compliance in a complicated regulatory landscape.

INVESTIGATION DERIVED WASTE

Cascade's IDW program is a "turn-key" addition to drilling services by streamlining the procurement process and lessening the burden of waste management for our clients.

Supported by a national network of preferred service partners, Cascade's IDW program offers the following services for both non-hazardous and hazardous waste:

- WASTE PROFILING, LABELING, MANIFESTING
- NATIONWIDE TRANSPORTATION AND DISPOSAL
- DRUM SERVICES | LTL AND FULL TRUCKLOAD
- RENTAL OF SOIL BINS AND WATER CONTAINMENT TANKS
- BULK SOIL AND WATER
 - TRANSPORTATION
 - DISPOSAL
 - DUMP TRUCKS, VACUUM TANKER SERVICES, EXCAVATION

HOW DOES IT WORK?

Cascade negotiates rates on a national level to obtain extremely competitive pricing for clients using the most efficient and cost effective vendor for the region that is being serviced. The process requires the client to fill out a brief Site Information Sheet and provide laboratory analysis for the waste. Cascade will then profile, manifest, and schedule the pick-up for the waste.
