

MIXING AND INJECTION PLANT

This fully automated mobile mixing trailer can mix and inject slurry with accuracy to the nearest pound. Digital load cells provide accurate measure units at all times. The super sack loading system eliminates the need for manual handling of injection materials, ensuring that your project is completed safely and efficiently.

GENERAL SPECIFICATIONS

- **Injection Pump Discharge Pressure**
 - 0-40 US Gallons per minute and pressure up to 500 PSI
- **Mixing Tank**
 - 433 US Gallons, full tank capacity, including taper cone bottom and tank mixing propeller relief valve
- **4" x 3" Centrifugal Mixing Pump Drive Motor**
 - 2000 PSI
- **Feed Auger with Isolation Slide Gate**
- **Top Loader Hopper Capacity of 6000 lbs.**
